

XEN ACADEMY VOICE RUNTIME

OPERATING MANUAL

XAVR 1.0.0 / XPS 4.5.0
Permission-gated spoken learning,
local assessment, and Resume
Anywhere

What XAVR does

XAVR lets a learner listen to a Spanish model phrase, record a spoken attempt, replay it, submit it for browser-supported assessment, retry without penalty, and preserve passing evidence in the same browser profile. Every Spanish phrase is followed by its English translation.

Complete a spoken activity

1. Open Academy and enter the Spanish voice activity.
2. Read Before you start. The microphone is off.
3. Play the slow or natural model.
4. Press Start Speaking; only this action may request microphone permission.
5. Choose Allow, speak, and press Stop Recording.
6. Replay, submit, or retry. Continue unlocks only after passing evidence.
7. Pass all six required speaking modes to satisfy the spoken Warden gate.

Controls

Control	Result
Start Speaking	Requests permission and begins capture after approval
Stop Recording	Stops capture and releases microphone tracks
Replay	Plays the current temporary recording
Retry / Delete / Cancel	Discards audio and returns to a safe state
Submit	Scores the available transcript and saves local evidence
Disable Voice	Turns voice off while keeping typed lessons usable

Assessment

Passing is 80/100: phrase completion 25%, word accuracy 30%, pronunciation similarity 20%, pacing 10%, fluency 10%, and hesitation 5%. Recognition confidence is separate. Browser-only pronunciation is a recognition-derived proxy; XAVR does not claim phoneme-level analysis.

Permission recovery

Denied

Open the browser's site controls, allow Microphone for Daily Bread, return to Academy, and press Retry.

Unavailable or no transcript

Use current Chrome or Edge on a microphone-equipped device. Typed Academy remains available. XAVR does not upload audio to compensate for missing browser support.

Privacy and reset

Audio exists only as a temporary in-memory browser object URL. It is never persisted or transmitted. Delete Recording, Retry, Cancel, Disable Voice, or leaving the page discards it. Transcript and score evidence remain in local browser storage. Use Reset local data to remove learner evidence and privacy-safe local telemetry.

Warden release checklist

- ☐ Allow path and deny/recovery path
- ☐ Start, stop, replay, deletion, retry, and disable
- ☐ Assessment, passing gate, best/latest evidence, and Resume Anywhere
- ☐ Typed fallback
- ☐ Mobile, keyboard, screen reader, reduced motion, and no overflow
- ☐ Privacy scan, secret scan, deployment binding, and live release marker
